AOD 1/3 Female	58cm	8 1/4"
Iplehouse YID Male	63cm	8 1/2"
Iplehouse EID Female	65cm	8"
Iplehouse EID Male	70cm	9"

Provided are the head circumference measurement for some common child and fashion dolls that we have patterns for at Designs by Jude. The chart is organized by doll height to help you locate dolls by size.

How to Measure Your Doll's Head for a Wig

Use a soft narrow tape measure and place around the doll's head at the back of the neck, behind both ears and across the top of the forehead. The position should reflect a natural hair line.

Next select the wig size that most closely matches the measurement. For example: a measure of 4 1/2" would likely take a size 4-5 wig.

Next choose the type and style of wig you want. If your intention is to cut, dye or restyle a wig, research which fibers are most suited for your purpose.

Finally, if needed, use a wig cap, Velcro dots, moleskin or rubber bands to help keep the wig secure.

**** Remember****

Most wigs will need some type of styling right out of the package and the final fit will depend on the wig construction and wig cap flexibility.
